TWELVE FEET OF WATER IN STREETS OF ENID

ENID, Okla. June 6.—Enid today faced the most disastrous flood in its history. Following six hours' rainfall, Bologny creek, running through the city, this morning widened from twenty feet to 2000 feet and flooded practically the whole of Enid, carrying away houses, flooding stores and endanger-ing lives. Today water stood twelve feet deep in Main street, covering two blocks of the business center. Fifty houses were swept away and carried down stream with the occupants, who had been driven to the roofs, shouting for help. Several families floated about at the mercy of the floodwaters, and in the darkness were in great danger. All were eventually rescued. Today the water is receding slowly.

In connection with the charge that forged tickets were used in Florida, there was made public today the story of the printing of those tickets over which the controversy has arisen. It appears that the original tickets were printed in Jacksonville, at the direction of State Chairman Chubb. After he had secured the tickets it is said that a representative of the people opnosed to the Coombs-Chubb faction visited the same printing shop and said that Mr. Chubb wanted an additional 200 tickets. They were struck off by the unsuspecting printer and charged to Mr. Chubb's account.

The altercation between representatives of rival factions in the Florida contest threatened for a time to be the most serious incident of the day. A movement was started early today looking to the division of some of the southern delegations, giving one-half a vote each to the opposing factions. This suggestion came from members of the committee who have not been keen in their supports of the Test starting. their support of the Taft candidacy. It was prefaced by the concession by Senator Crane that the nomination of Secretary Taft on the first ballot is practically assured and there, in the setpractically assured and there, in the set-tlement of the remaining contests, an effort should be made to recognize the negro voter as a question of 'party expediency'.' The out-and-out Taft members combatted this idea on the ground that all of the Taft delegations from the South are 'mixed,' the mem-bership being about evenly divided be-tween the whites and the negroes. They construed the movement as an effort to construed the movement as an effort to break down their organization, and some members went so far as to say that it was an attempt to get anti-adminis-tration men named on the resolution committee. The plan was not openly presented to the committee.

The early adjournment today, with an intervening Sunday before the next session, is expected to bring this plan to a head on Monday. A sharp contest between the Taft and the anti-Taft members seems likely,

vestigation appointed by Admiral Se-bree.

Admiral Sebree has wired a report containing practically the same in-formation as the newspapers contain. The four-inch boiler hurst he says, at 4:11 a.m., while the vessel was under full way. Following the accident the admiral communicated with the first di-vision of the Pacific fleet to obtain ad-ditional dressings for the wounded men, and then proceeded to San Pedro. The admiral's report gives the list of dead and injured practically as given in the press dispatence.

Several months ago there was an accident to the boiler machinery on the cruiser St. Louis while off the Pacific coast, caused by the unwelding of a water log. This, however, was not as severe as the accident on the Tennessee, five men being badly scalded, but recovering after ten days treatment on the coast. There have been a number of serious accidents to naval vessels in recent years, but the officials claim recent years, but the officials claim that the number is smaller and the re-sults less serious than in foreign pavies.

Discovery.

Behold congressmen, who have here tofore chanted the praise of protection-ism, now thundering at extortions of an odious paper trust! Behold Speaker Cannon, with an election in sight, Cannon, with an election in sight, championing a downtrodden and help-less press! How woodrous are the changes of time! Hitherto, when New England has cried aloud for tariff re-form, and has spoken harshly of the dear Mother of Trusts, undaunted and neonverted congressmen have been horrified by the audacity of the proceeding. But now, with an election coming on, they find that one trust is the destroyer of freedom, that it shackles the mightiest agency for the dissemination of intelligence and so an election of the second seco shackles the mightlest agency for the dissemination of intelligence, and so on, and they assume a very noble and heroic attitude. Yet we await, with what calmaess we may, the further discovery by Uncle Joseph and his associate heroes, of the injustices bred by protestionism in other industries. tectionism in other industries. And are all the other prodigies of privilege to remain forever free to fatten on the life-blood of a hapless people? The adjectives are not ours. We pick them from the lips of protectionists who have suddenly discovered horror and shame in one of the articles of their creed. Is there any hope that they may go far-ther and find worse?—Boston Herald.

CHILD STUMBLES INTO PAIL OF BOILING WATER

Flesh Is Parboiled: Injuries Probably Will Result in Death.

While her mother was at the cunboard getting her a cooky, little Lucile Reborn of 45 Vine street, twenty-one months old today, pitched head foremost into a pail of boiling scrub water Friday afternoon late and was in all probability fatally burned. From her neck to her feet on the left side the little one's flesh was parboiled and fell away

one's flesh was parboiled and fell away in large pieces.

The tot's mother, hearing a scream turned from the cupboard, and rushing to the pail, grabbed the screaming budy from the steaming waters before the whole body was immersed and berned.

The injured infant was taken to the Holy Cross hospital early Saturday afterneon, but there is no hope for its recovery. If it lives grafting will be necessary. The hospital authorities say that skin will have to be grafted over the entire left side and possibly on the left cheek, from which the flesh also was burped.
